# Lab 6
# BFDjango TODO api

- Take existing lab 5 project
- Add todo list model which is the groups of todos (todo list constains todos)
- Create api methods for the urls below using ViewSets
- Create needed serializers (nested serializers)
- Add logging for each  method
- Add new fields in Todo model to implement FileUpload and ImageUpload

Write urls and views for next urls:
1. /todo_lists (GET and POST)
2. /todo_lists/{id} (GET and PUT)
3. /todos (POST)
4. /todos/{id} (PUT)
5. /todo_lists/{id}/todos/
